Assignment 2: Daily Standup Simulation - Write a script for a Daily Standup meeting for a development team working on the software feature from Assignment 1. Address a common challenge and incorporate a solution into the communication flow.

Daily Standup Meeting - Social Sharing Feature

Participants:

- Jessica - Project Manager
- Mark - Backend Developer
- Sarah - Frontend Developer
- David - QA Tester

Jessica: Alright team let's get started. Today's date is April 4th, and we're on Day 3 of Sprint 1 for the social sharing feature. Mark, can you kick us off with your update?

Mark: Yesterday, I finished the initial integration with the Facebook API. I was able to successfully send test content using their Graph API. Today, I'll be focusing on integrating with Twitter's API and ensuring proper authentication handling.

Jessica: Great work, Mark. Sarah, how are things in the end?

Sarah: I completed the design mockups for the social sharing buttons and the platform selection menu. I'm currently working on implementing the user interface elements and integrating them with the backend functionalities. However, I ran into a challenge - the button styles might conflict with our existing design theme on certain pages.

Jessica: Thanks for letting us know, Sarah. That's something we need to address before moving forward. David, any updates from testing?

David: Not yet, as the core functionalities aren't fully integrated. But based on Mark's progress, I can start preparing some test cases for the Facebook API integration. Maybe Sarah and I can collaborate this afternoon to ensure the UI elements align well with our existing styling and don't cause any visual inconsistencies.

Jessica: Excellent suggestion, David. That should help us deal with any potential issues early on. Sarah, does that sound like a good plan?

Sarah: Absolutely! I can share the UI mockups with David and get his feedback on the styling before finalizing the implementation.

Jessica: Perfect. Mark, any roadblocks you foresee with the Twitter integration?

Mark: Not at this point, but I'll keep you updated if anything pops up.

Jessica: Sounds good. We seem to be on track. Let's keep up the good work! Remember, Sarah and David, collaborated this afternoon to address the UI styling challenge. We'll discuss any further action items during tomorrow's standup. Thanks, everyone!
